

Download Instructions

My browser is Internet Explorer

Click on the Download link to open a pop up window.

Step 1: Select Save.

Notes:

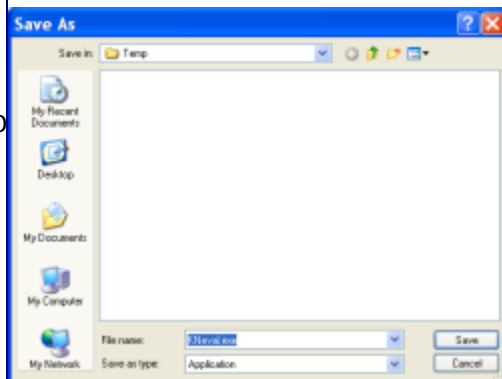

1. You may select Run or Save but Save is a better option giving you a copy of the installation file on your PC.
2. The security message can be ignored.

Step 2: Save the file to a temporary folder.

Notes:

1. The installation file may be saved to the default download location on your PC this is often the desktop or a nominated temporary folder.
2. If you have purchased Kalnote we advise you to keep a copy of the installation file in a more secure location.

Step 3: Click run to install the file.

Note: We recommend that you read the Getting Started document prior to running the installation program.
